

FRONT
FEST

2019

The conference for all
the front-end
community

Past edition

On February 17, 2018, the 2nd edition of Front Fest took place at La Nave Madrid.

More than 350 Frontenders met to attend 8 talks given by professionals from the national front-end community: Javier Abadía, Belen Albeza, Ramón Guijarro, Jorge Barrachina, Joan León, among others.

In this new edition we want to promote the presence of new talents in the sector.

Location

Once again in this edition we will have the auditorium of [La Nave](#) for the talks and the entire central space for areas of networking, food, activities, etc...

Commitment to diversity

The Front Fest organization is totally dedicated to the realization of an event committed to diversity, based on respect and looking for a safe space for anyone in our society.

Check out our [Code of conduct](#).

The space where it will be developed will have access for the disabled, the agenda will be worked on so that it is as diverse as possible and there will be menus for all food options (including food allergies and intolerances).
